Cortisol Test

---

**2 Your Results**

Your daily profile looks as follows:

| Time           | Cortisol in Saliva | Reference Values | Evaluation          |
|----------------|--------------------|------------------|---------------------|
| First sample   | 1,8 ng/ml          | 1,8 - 14,5 ng/ml | inside target value |
| after 2 hours  | 14 ng/ml           | 3,3 - 10,3 ng/ml | above target value  |
| after 5 hours  | 0,7 ng/ml          | 0,7 - 5,7 ng/ml  | inside target value |
| after 8 hours  | 0,6 ng/ml          | 0,6 - 4,7 ng/ml  | inside target value |
| after 12 hours | 0,3 ng/ml          | 0,3 - 3,3 ng/ml  | inside target value |

If your values lie outside the reference values, you should contact a physician and discuss further steps with him/her.

Your system for life.
